

Request Refills On-Line

With Family Health Care Pharmacy's RefillRX page, you have access at your fingertips! This website/app allows you to register, login and refill your active prescriptions with your pharmacy. It will even remind you when it's time to refill. It is an online portal used to fill your active prescriptions and does not save any of your identifying information online. And the best part— it's free! There is absolutely no cost for our customers to utilize the online refill system. Your prescriptions are submitted in a secure, hassle-free way while saving no identifying information online.

Sign up at:

We Can Help You Save!

Our pharmacies are open to both Family Health Care patients and the community. Special pricing may be available for those who qualify. We accept most insurances, including Medicare and Medicaid.

As a Federally Qualified Health Center (FQHC) and a Patient Centered Medical Home (PCMH), our goal is to provide the best possible care through a team-based effort with you and your provider.

Having trouble affording your medication? We have...

- Special programs designed for Family Health Care patients.
- Direct Assistance programs through drug companies and non-profits.
- A Sliding Fee Program designed to assist patients based on income needs rather than insurance status.

Talk with a Pharmacist or onsite Financial Counselor to see if you qualify today.

Take Time to Compare

By comparing, you'll find:

- We are located right down the hall from your provider which allows us to work together, finding you the best medications at the lowest cost.
- We double-check every prescription for possible drug interactions with other prescriptions or over-the-counter medications you may be taking.
- Our pharmacies offer Medication Sync which allows for you to refill and pickup all of your medications at the same time and avoid multiple trips to the pharmacy.
- You can request your prescription refills via a mobile phone app or online. (See back)

We're Here For You

Our Pharmacists are happy to help you in a series of different ways, including:

- Reviewing your medications for drug or food interactions.
- Suggesting a new medication which may work better with your body and your health challenges.
- Resources to help you kick the smoking habit.
- Providing vaccines to those who qualify.
- One on one medication reviews and education with an onsite pharmacist.
- Tips and tools to help you in remembering when and how to take your medication.

We'll make
time for you.
